

Precision.  
Innovation.  
Strength.

*Your One-Stop Shop for Precision Enclosures and Custom Heating Solutions.*

# Metalli Dynamics at a Glance

Established in 1972, our parent company has grown from a visionary fabrication firm to a leader in precision laser cutting & metal fabrication. Our new wing, Metalli Dynamics, specialises in control cabinets, sheet metal products, metal enclosures, high-level assembly, prototype development to production, in-house fabrication, machining, electrical and electronics, and customised heating solutions. Our journey is marked by innovation, a commitment to quality, and a continuous quest for improvement, culminating in our ISO 9001-2015 certification.

## Our Legacy

Supported by the esteemed TELTECH Group and ENPAR Group, Metalli Dynamics leads the Indian precision metal fabrication industry. TELTECH boasts over 50 years of engineering excellence in ovens, furnaces, and heaters, with cutting-edge in-house R&D centers. ENPAR Steels, also with over 50 years of experience, supplies custom-cut steel to various OEMs and proudly partners with JSW Steel.

## Our Vision

Our vision is to be the global choice for custom-made products & services, celebrated for our responsiveness and dependability. We aim to become a key partner in the aerospace, defense, automobile, and electrical industries.

## Our Mission

Our mission is to continuously innovate and develop products & services using cutting-edge machines and technology, empowering our partners to understand their customers' needs and stay ahead of the competition.

## Quality Assurance

Quality assurance and commitment are evident in everything we fabricate, test, and deliver. Our quality technicians strive to uphold sustainable quality management principles. Our dedication to quality, paired with innovative technology and comprehensive manufacturing solutions, drives our business and gives our customers a competitive edge in the global marketplace.

## Environmental & Safety Commitment

We are committed to understanding and addressing the need for environmental protection by introducing LED lighting and promoting green plants and gardening. We ensure our products and business operations align with these goals and comply with all statutory requirements. Our dedication to safety and environmental sustainability is integral to our operations, aiming for a ZERO ACCIDENT facility and strict adherence to environmental protections.

# OUR CAPABILITIES & SERVICES

## Comprehensive Solutions Under One Roof

A dedicated, highly skilled team with over 50 years of experience, bolstered by in-house design and development expertise. Equipped with cutting-edge technology, including 3 axis CNC Laser cutting machines, CNC Press Brake, and in-house fabrication capabilities for a variety of welding processes.

We Specialise in Stamping Components, Precision Sheet Metal Fabrication, Enclosures, Machined Components, Industrial & IT Racks, Mechanical Assemblies, and 3D-Additive Metal Printing.

## Our Specialised Services

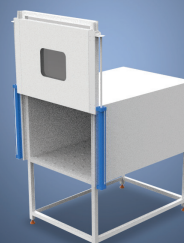

- We offer precision laser cutting and bending with innovative in-house design and fabrication, featuring weld-free locking mechanisms and cinching nuts for assembly. This ensures superior aesthetic quality and exceptional craftsmanship.
- Our fabrication expertise extends to industrial racks, powered by a 3 kW Fibre Laser with a large bed size of 3m x 1.5m, enabling precise pipe profile cutting. We also provide CNC Turret Punching & Bending services bending machine capacity 3000 x 12mm thickness and 220 Ton, catering to various metal types including carbon steels, aluminum, and stainless steel.
- We excel in mechanical assembly and machining, boasting CNC 4-Axis Vertical Machining Centers, CNC Turning Centers, and Drilling and Tapping Machines for diverse project requirements.
- Our capabilities include robotic gasket laying machines and riveting services, ensuring efficient and precise fabrication for both painted and powder-coated assemblies.
- With over 50 years of industry experience and cutting-edge technical expertise, our core competency is designing highly energy-efficient, durable, and environment friendly heating solutions.

## Why Choose Metalli Dynamics ?

- Holistic Approach- Our infrastructure is designed for optimum efficiency and minimal waste, embodying our lean manufacturing system expectations.
- Client Success Stories- Proud partners with industry leaders such as HAL, Heatcon, and TELTECH, reflecting our excellence and reliability.

## Industries We Serve

Our versatility and expertise span a wide range of sectors, including Automotive, Defense & Aerospace, Electrical, Power Transmission and Distribution, Electronics, Healthcare, IT and Data Centers, Machine Tools, Metro and Railways, Oil and Natural Gas, Solar and Renewable Energy, Telecommunication and Networking, and more.

## Our Process in Action: From Enquiry to Production

## Join Our Legacy

We invite you to explore how Metalli Dynamics can enhance your operations with our cutting-edge solutions and dedicated service.
